

Early Social Development and Intervention Lab

Dr. Jessica Bradshaw

Lab Director, Assistant Professor

Department of Psychology

University of South Carolina

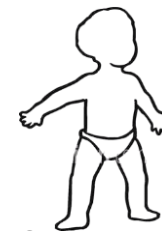

What We Do

We follow infants and their families...

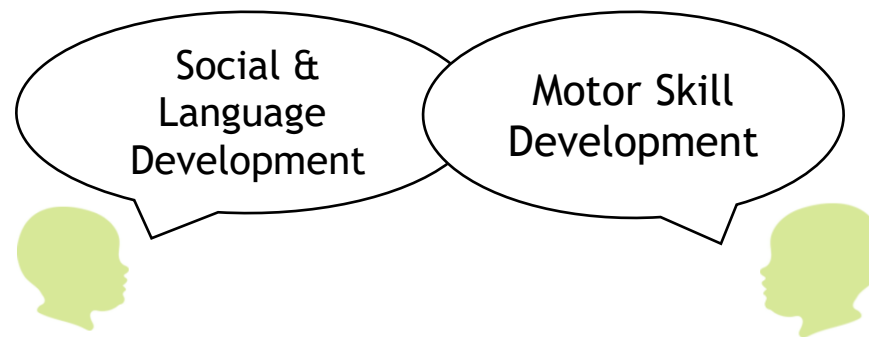

Birth

2-3 years

We look for early predictors of...

Our ultimate goals are to...

- Improve **early detection** of ASD
- Inform caregivers about their child's **developmental outcomes**
- Provide further **resources** for families
- Create a **community** for children with ASD and their families

Who Can Participate

- Infant siblings (0-6 months) of children with ASD
- Infants born preterm (32-36 weeks)
- Typically developing infants (0-4 months)

We are recruiting expecting parents who fit the above categories!

Lab Activities

In the lab participants will...

Engage in Developmental activities/assessments

- Interact with toys & caregivers

Watch short movies

Give Heart Rate Measurements

Lab visits will last ~2 hours every month until the participant is 6 months old, and then once every three months

Benefits to Parents

Feedback on their Child's Development

- ▶ Learn about developmental milestones as they are happening during lab visits
- ▶ Receive recommendations to seek further services
- ▶ Receive full clinical report at the end of the study

Monetary Compensation

- ▶ Receive \$25 gift card with every visit
- ▶ Opportunity to earn up to \$300

How to Participate

Contact us at:

- Email (esdilab@mailbox.sc.edu)
- Text (803) 993-8356
- Call

To Refer:

- Fill out referral form esdilab.com/refer
- Provide flyer
- With families permission, send their contact information to esdilab@mailbox.sc.edu

Thank you!
